# IMPORTANT SAFETY INSTRUCTIONS

It is the sole responsibility of the purchaser of Intenza products to instruct all individuals, whether they are the end user or supervising personnel on proper usage of the equipment.
It is recommended that all users of Intenza exercise equipment be informed of the following information prior to its use.

## 1.1 Important Operation Instructions for Owners

Follow these guidelines to maintain proper working condition of the equipment—
**IMPORTANT** Do not modify the equipment or any of its parts, or permanently remove any part from the equipment. Do not use accessory attachments that are not recommended by Intenza, as such attachments might cause injuries.

- Qualified technicians must perform all regular maintenance.
- Do not remove warning labels for any reason. They contain important information. If unreadable or missing, contact your Intenza dealer for a replacement.
- Check that all fasteners are securely tightened.
- Make sure that trainers, facility personnel, and maintenance technicians understand how to use the equipment, know important safety guidelines, and can recognize potential problems such as loose hardware, or cracked weld. If any staff member witnesses unsafe use of the equipment, he or she should address the user directly, demonstrate the proper technique, and review the Important Safety Instructions for Users.
- Intenza recommends posting a copy of the Important Safety Instructions for Users near the equipment in a prominent location.
- Place an “out—of—order” sign on the equipment during maintenance of the equipment or the surrounding area. Users should never be allowed to operate the equipment until it has been inspected and works properly. If a piece of equipment needs service, keep it out of use until it is repaired. Place an “out—of—order” sign on the equipment and make sure the facility’s personnel know not to allow anyone to use the equipment until it is working properly.
- Do not place the equipment outdoors or on wet surfaces.

## 1.2 Important Safety Instructions for Users

Read all instructions before using the equipment. These instructions were written to ensure your safety and to protect the equipment.
Equipment is intended for commercial use.
Before beginning any fitness program, you should obtain a complete physical examination from your physician.

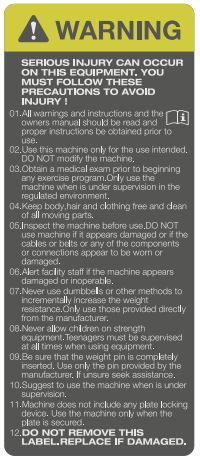
When using exercise equipment, you should always take basic precautions, including the following—

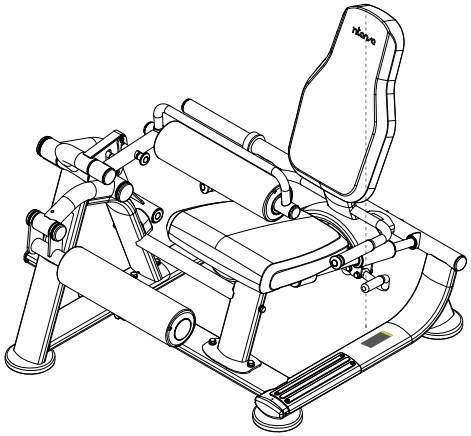
- If you do not understand how to operate a piece of equipment, ask someone from the facility such as a trainer to demonstrate how to use it and explain any safety instructions.
- Do not allow children on or near the equipment. Do not leave children unsupervised around the equipment.
- Use the equipment only for its intended purpose. Do not use accessory attachments that are not recommended by the manufacturer, as such attachments may cause injuries.
- Wear proper exercise clothing and shoes during a workout: no garments that impede perspiration and no loose clothing. Tie long hair back. Keep garments or towels away from moving parts.
- Do not overexert yourself or work to exhaustion. Use reasonable judgment when working with weights. Avoid using excessive weight, which may cause injury.
- If you feel pain, faintness, dizziness, or abnormal symptoms, stop exercising immediately and consult your physician.
- Keep head, limbs, fingers, and hair clear of all moving parts while the equipment is in use. Keep hands clear of racking pegs.
- Never drop or insert objects into any opening in the equipment.
- Check that all fasteners are securely tightened. Handle attachments should be properly connected.
- Always check the equipment before using it. If you spot a potential problem, contact someone in the facility immediately. Do not use the equipment until the facility has verified that the equipment is working properly. Do not attempt to fix broken or jammed equipment.
- Do not use the equipment outdoors or on wet surfaces.
- Do not drop or slam the weight stack while exercising.
- Use only Olympic—style weight plates with a 2" bore for training weight. Do not use dumbbells or any other means to increase weight resistance.
- Always use weight plate retention devices like straps, clamps, or pins to ensure safety.
- Add weight plates only up to the unit's load limits, and make sure they are placed entirely on the weight rod.
- Always follow the load rating guidelines for any weight equipment, including weight rods and band peg limits, to prevent accidents. If you have any questions about proper weights and loading, ask a trainer or facility representative for help.

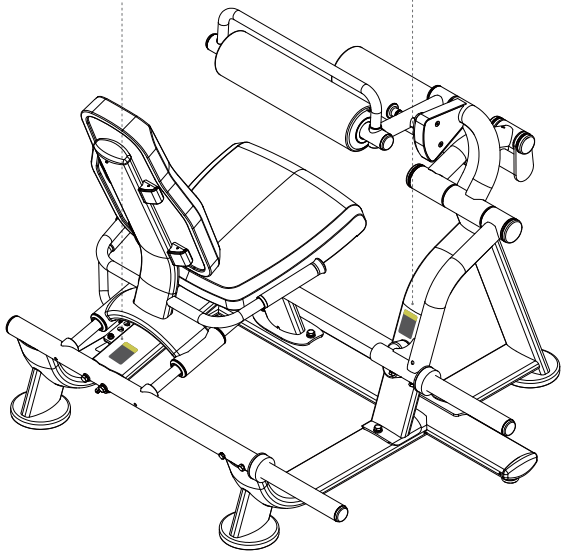
## 1.3 Warning Label Locations

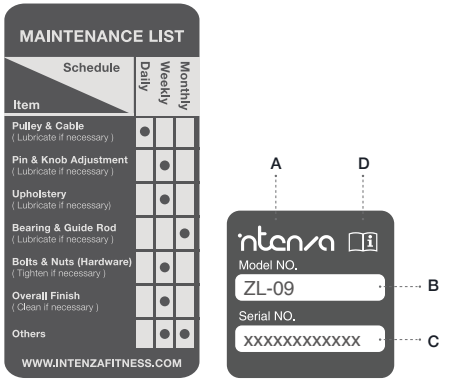
# WARNING

During all operations involving transport, maintenance and cleaning, pay attention to any part of the equipment where body parts may become trapped. Attention must be paid to the labels attached to the equipment, as they provide information about possible risks and hazards. We recommend immediately replacing the labels when they become damaged or difficult to read.



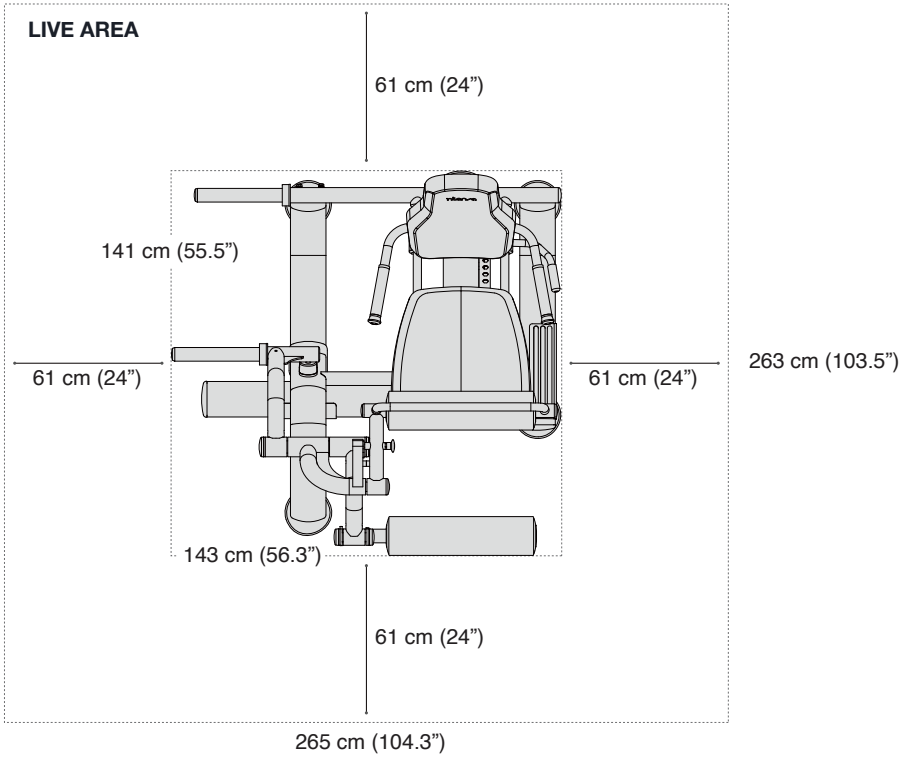






# 2. Installation and Assembly

## 2.1 Product Information



**SERIAL NUMBER LABEL LOCATION**

| | |
|---|---|
| A | Manufacturer’s name |
| B | Model number |
| C | Serial number |
| D | Consultation of user manual required |

**PRODUCT INFORMATION**

| | | |
|---|---|---|
| USAGE CLASS | Class S (studio) | |
| LENGTH | 141 cm | 55.5 inches |
| WIDTH | 143 cm | 56.3 inches |
| HEIGHT | 117 cm | 46.1 inches |
| EQUIPMENT WEIGHT | 159 kg | 350.5 lbs |
| LIVE AREA | 263 x 265 cm | 103.5 x 104.3 inches |
| MAXIMUM USER WEIGHT | 160 kg | 352.7 lbs |
| MAXIMUM TRAINING WEIGHT | 125 kg | 275.6 lbs |

**WEIGHT PLATE SPECIFICATION** (FOR TRAINING SLEEVES ONLY)

| | | |
|---|---|---|
| BORE SIZE | 50 mm | 2 inches |
| MAXIMUM OUTER DIAMETER | 450 mm | 17.7 inches |
| MAXIMUM LOAD (PER SLEEVE) | 125 kg | 275.6 lbs |
| USABLE SLEEVE LENGTH | 250 mm | 9.8 inches |

## 2.2 Place of Installation

To ensure safe, comfortable and effective use of the equipment, the place of installation must comply with certain specific requirements. In particular, before choosing where to install the equipment we recommended that you check the following conditions are available—

- A temperature between +10˚C and +25˚C.
- Sufficient ventilation to maintain a humidity level between 20% and 90%, when the equipment is in use.
- Sufficient lighting to make the area a safe and relaxing place to exercise.
- Sufficient clearance on all sides of the equipment, taking into account its maximum dimensions when in use, to ensure safety.
- A flat, stable and vibration—free floor surface, with sufficient load bearing capacity for the equipment's weight.
- If the equipment is to be installed in a public recreation area, the place of installation must comply with all the requirements of the regulations currently in force.

# WARNING

The equipment must be installed and used in a place where access and supervision are specifically controlled by the owner. When installing the equipment, use suitable personal protective equipment.

## 2.3 Assembly Guide

### UNPACKING

Thank you for purchasing a Intenza product. Your Intenza product is inspected before it is packaged. It is shipped in multiple pieces to facilitate the compact packaging of the machine. Prior to assembly, confirm all the components by matching them with the part list. Carefully unpack the unit from this box and dispose of the packing materials in accordance with your local laws.

### CAUTION

The weight of the product is heavy. To avoid injury to yourself and prevent damage to the frame components, be sure to have proper assistance removing the frame pieces from this box. Please be sure to install the equipment on a stable base, properly level the machine and leave at least two feet of clearance to enter and exit the machine.

**QTY 8**

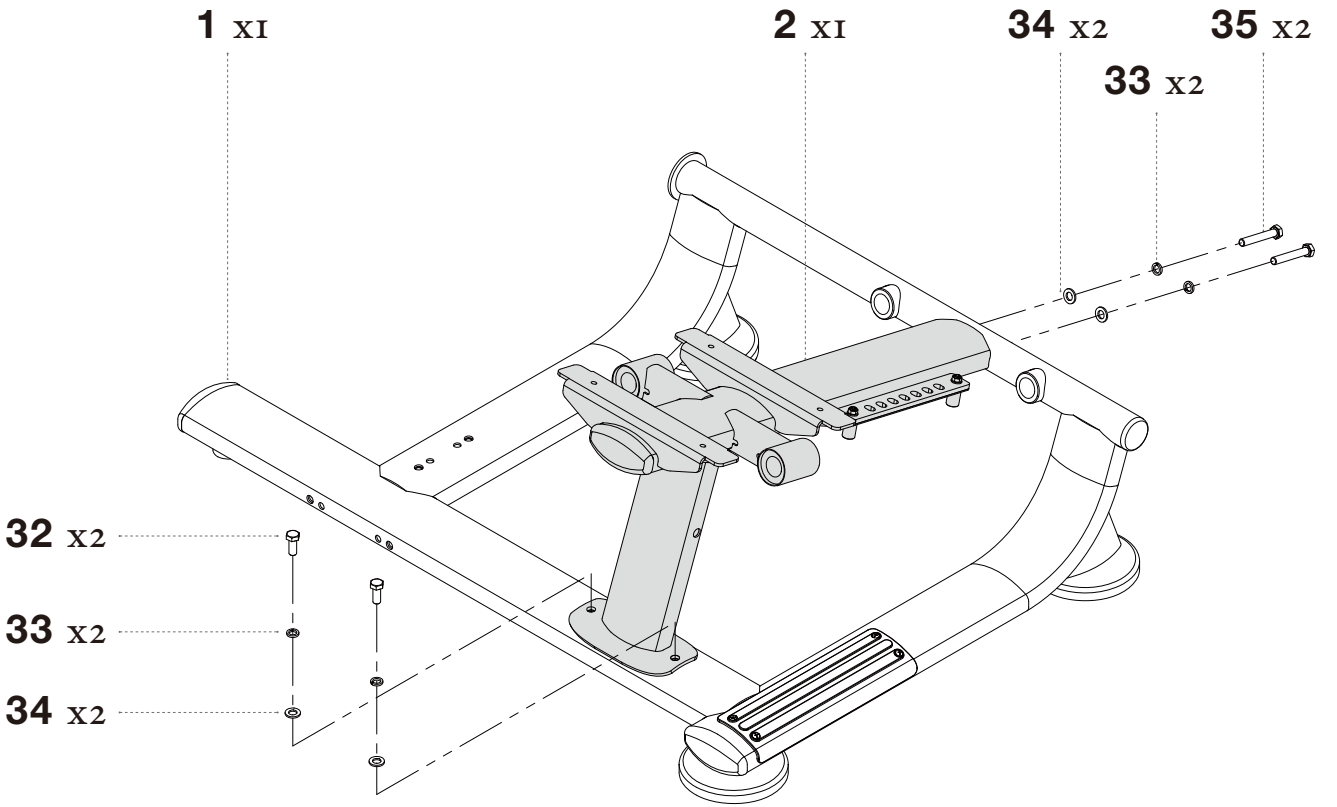
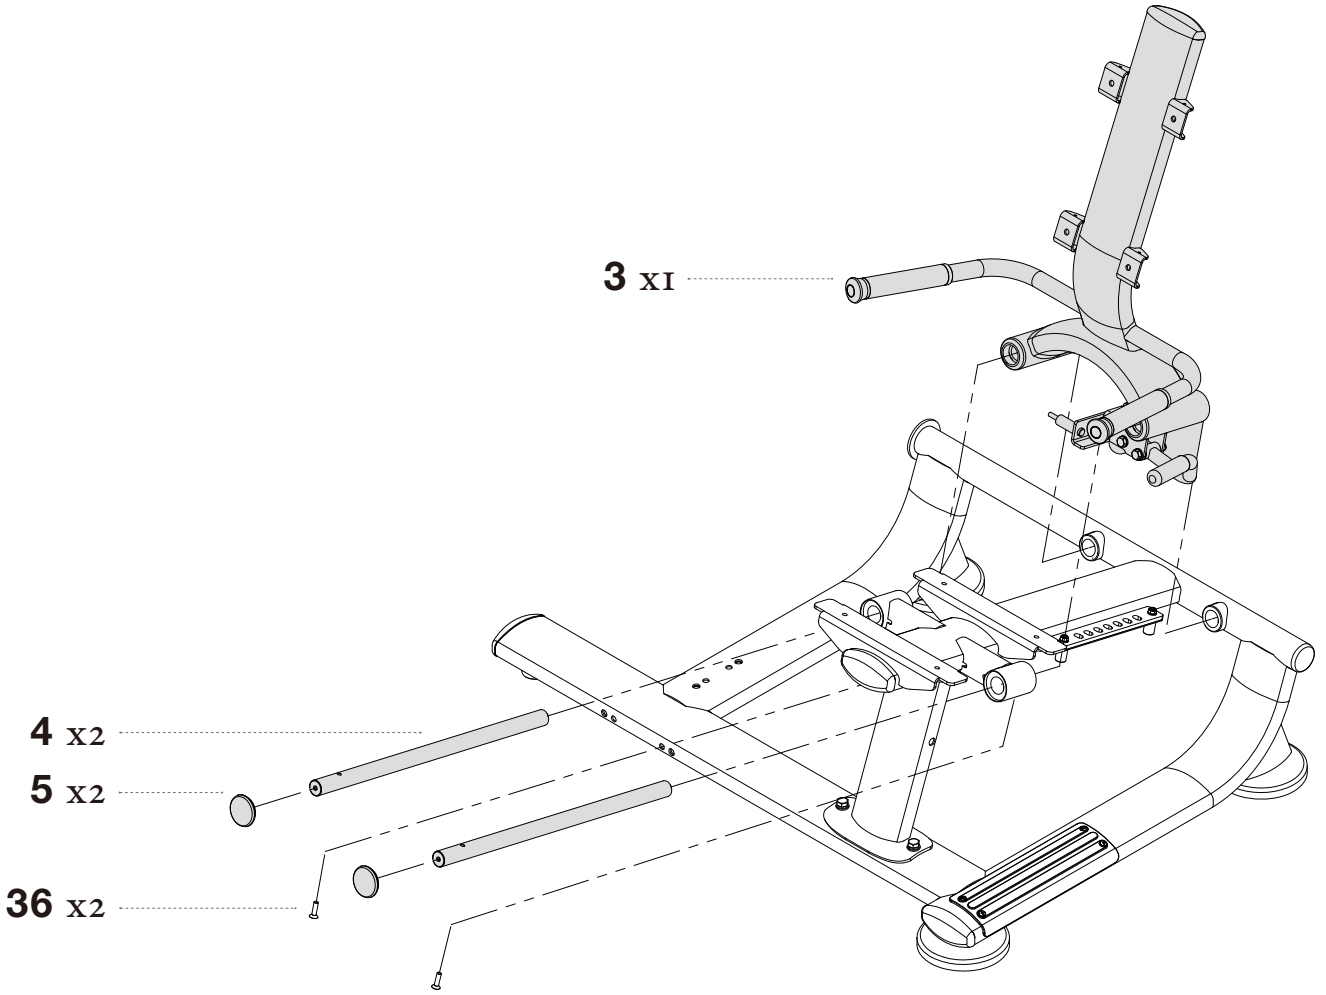
## 2.3 Assembly Guide

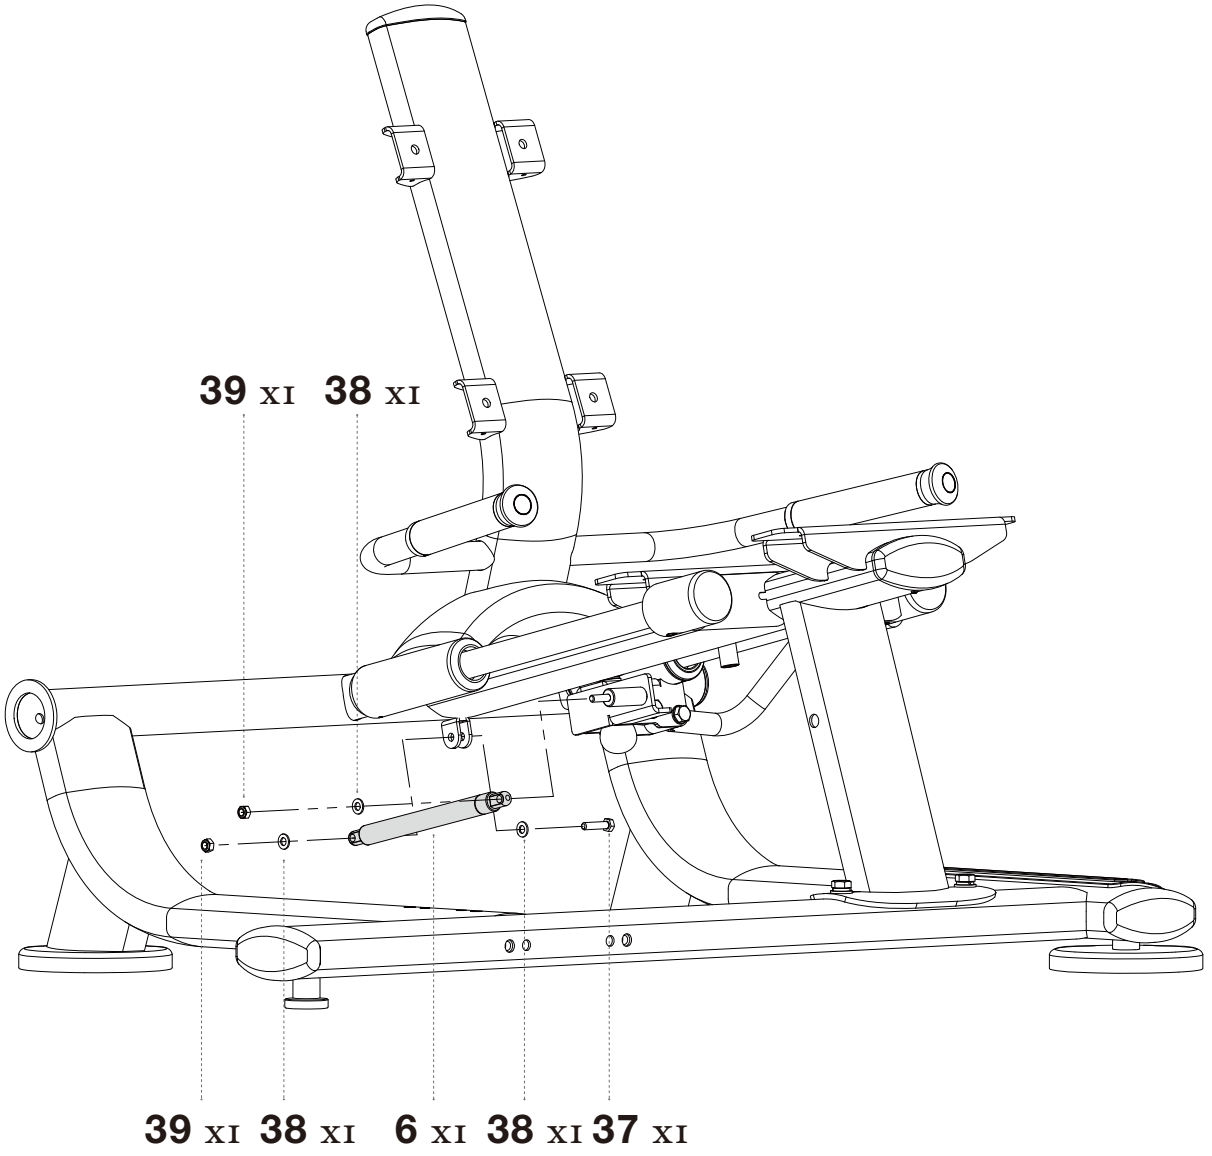
**STEP 1**
LOOSELY fasten the bolt connections in this step. Do not fully tighten.



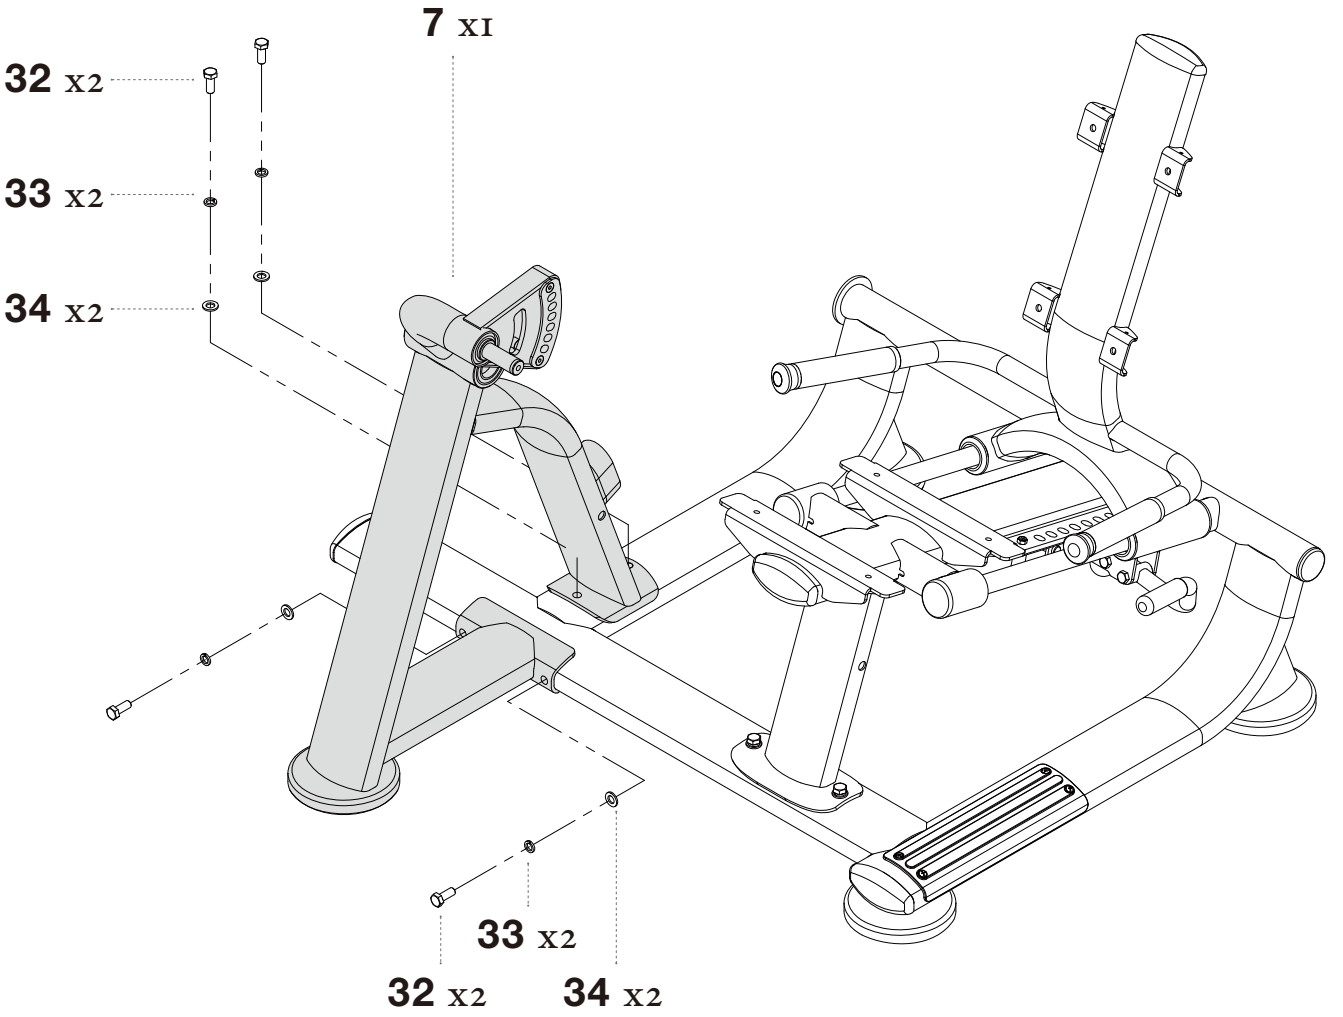
**STEP 2**
SECURELY tighten all bolt connections.



**STEP 3**
SECURELY tighten all bolt connections.

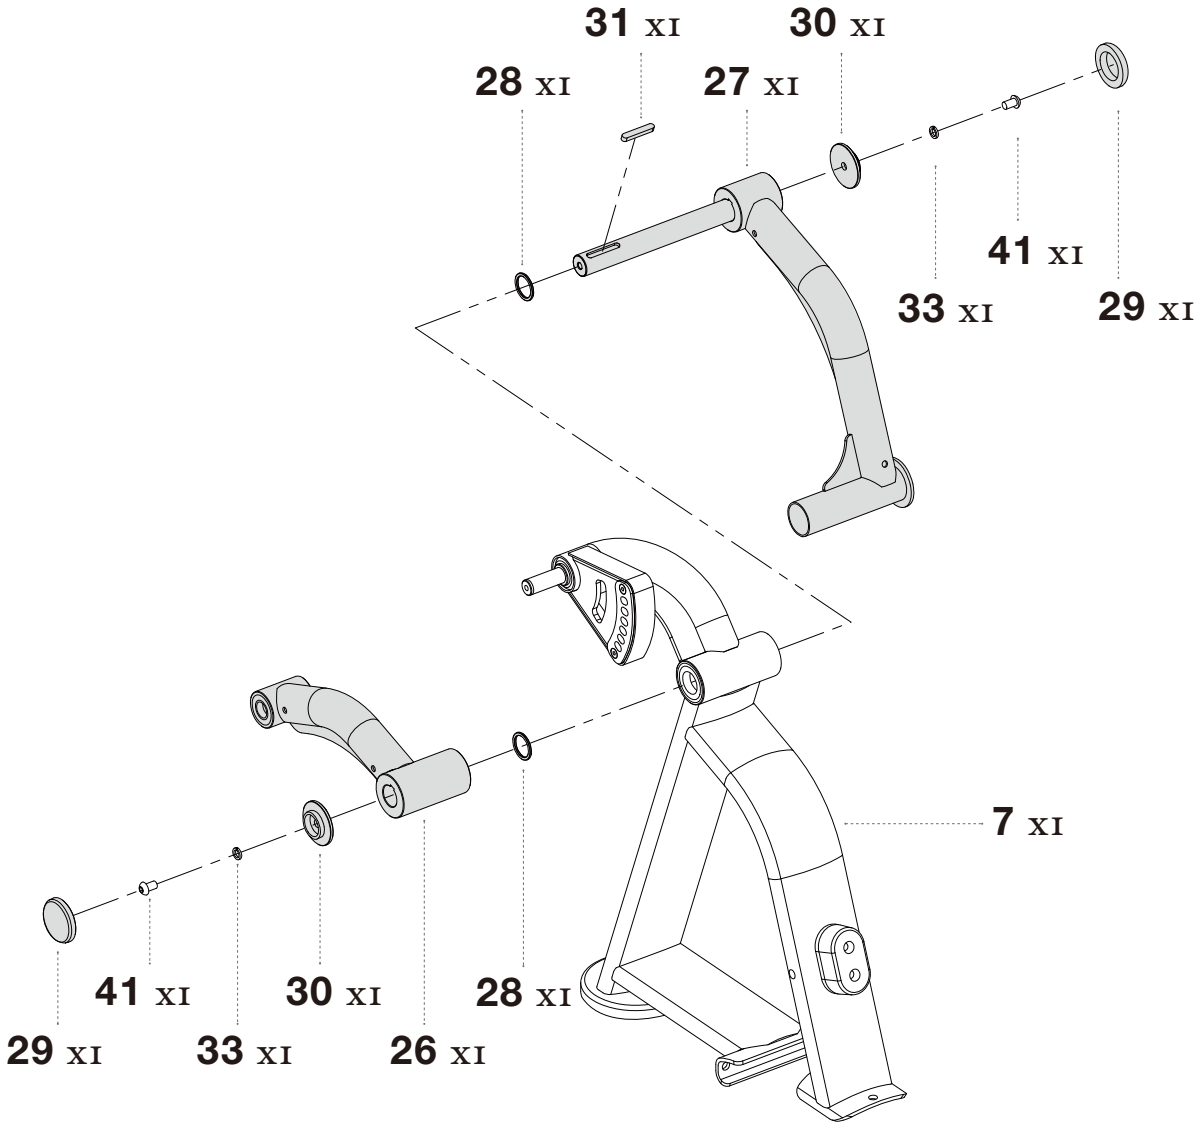


**STEP 4**
LOOSELY fasten the bolt connections in this step. Do not fully tighten.

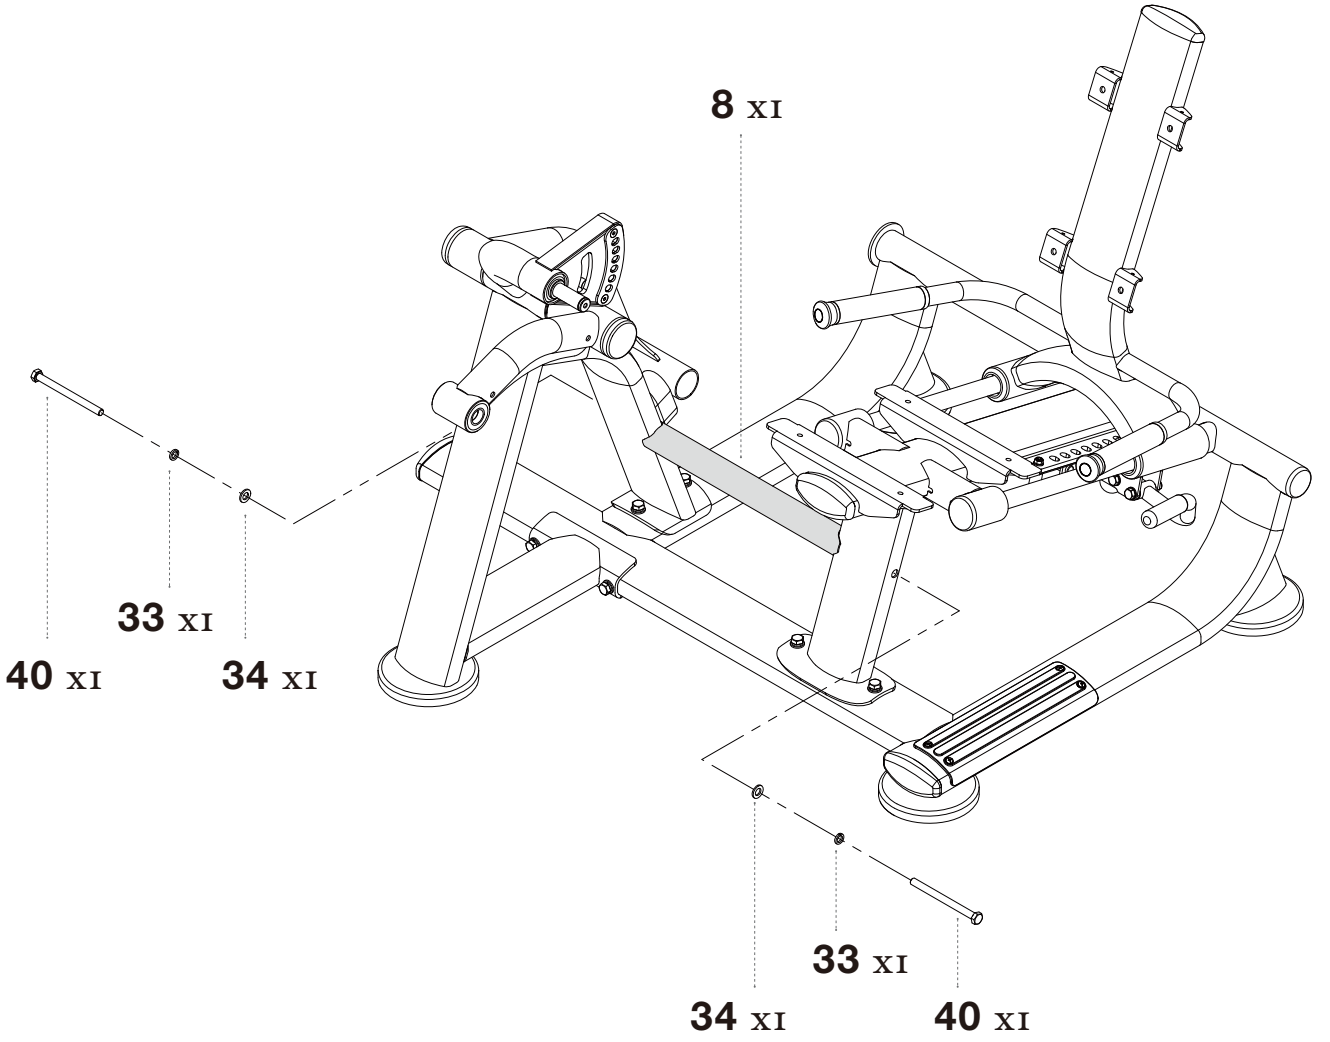


**STEP 5**
SECURELY tighten all bolt connections.

Some parts have been hidden for assembly clarity.

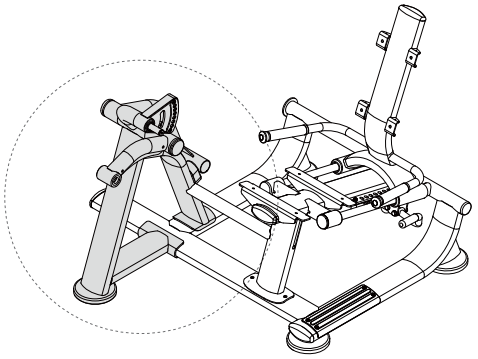


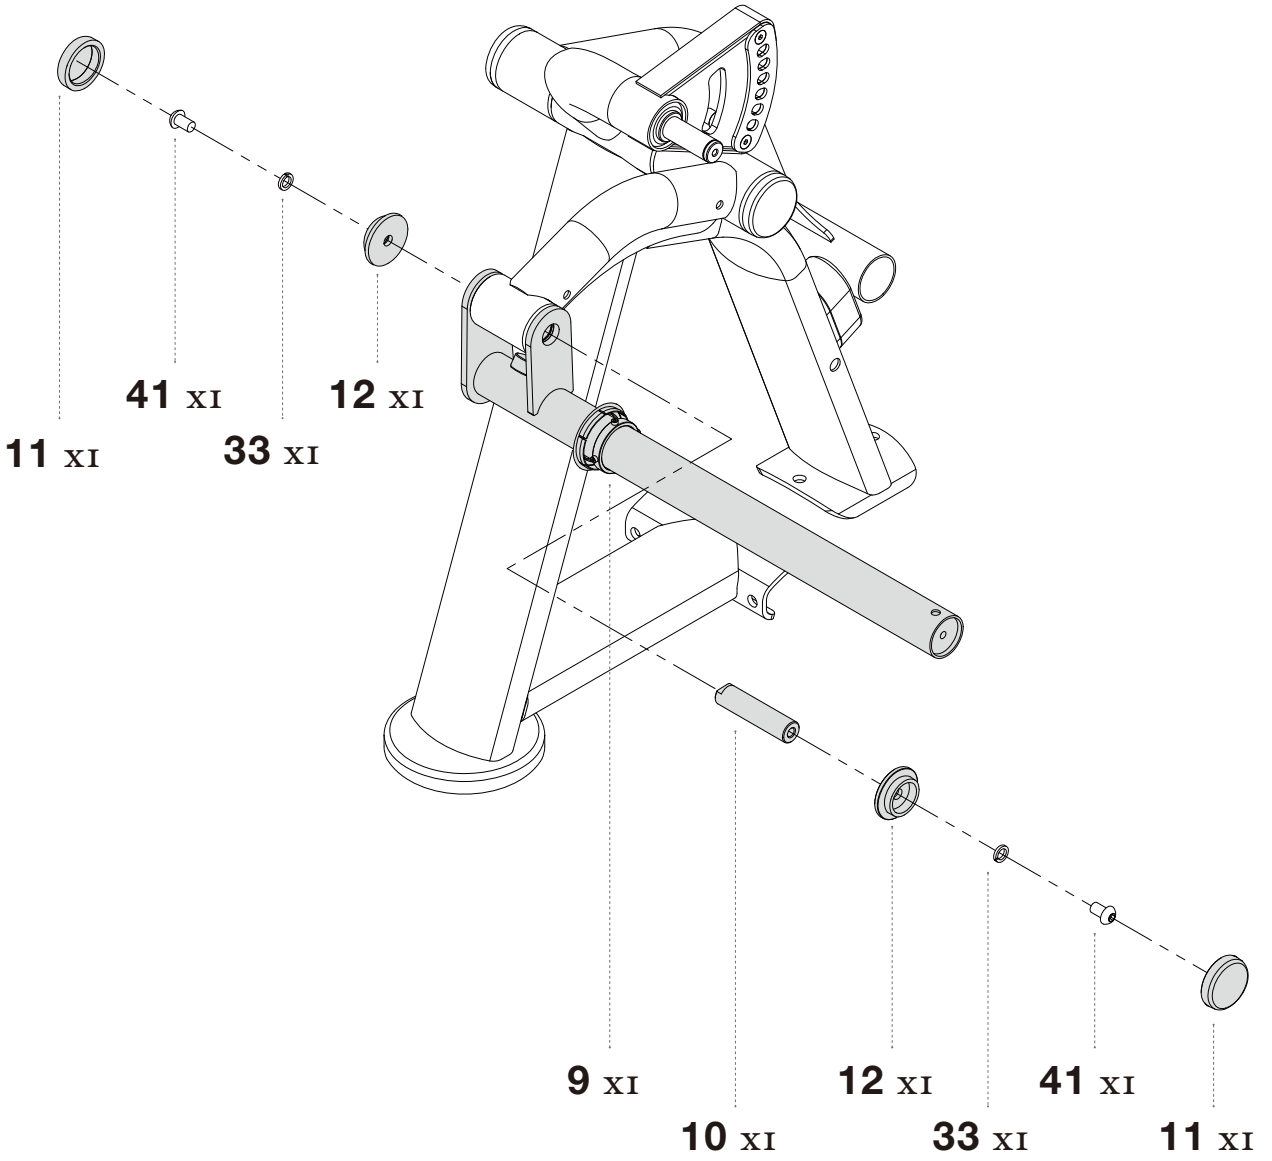
**STEP 6**
SECURELY tighten all bolts from Step 1, 4 and 6 after confirming proper alignment.



**STEP 7**
SECURELY tighten all bolt connections.

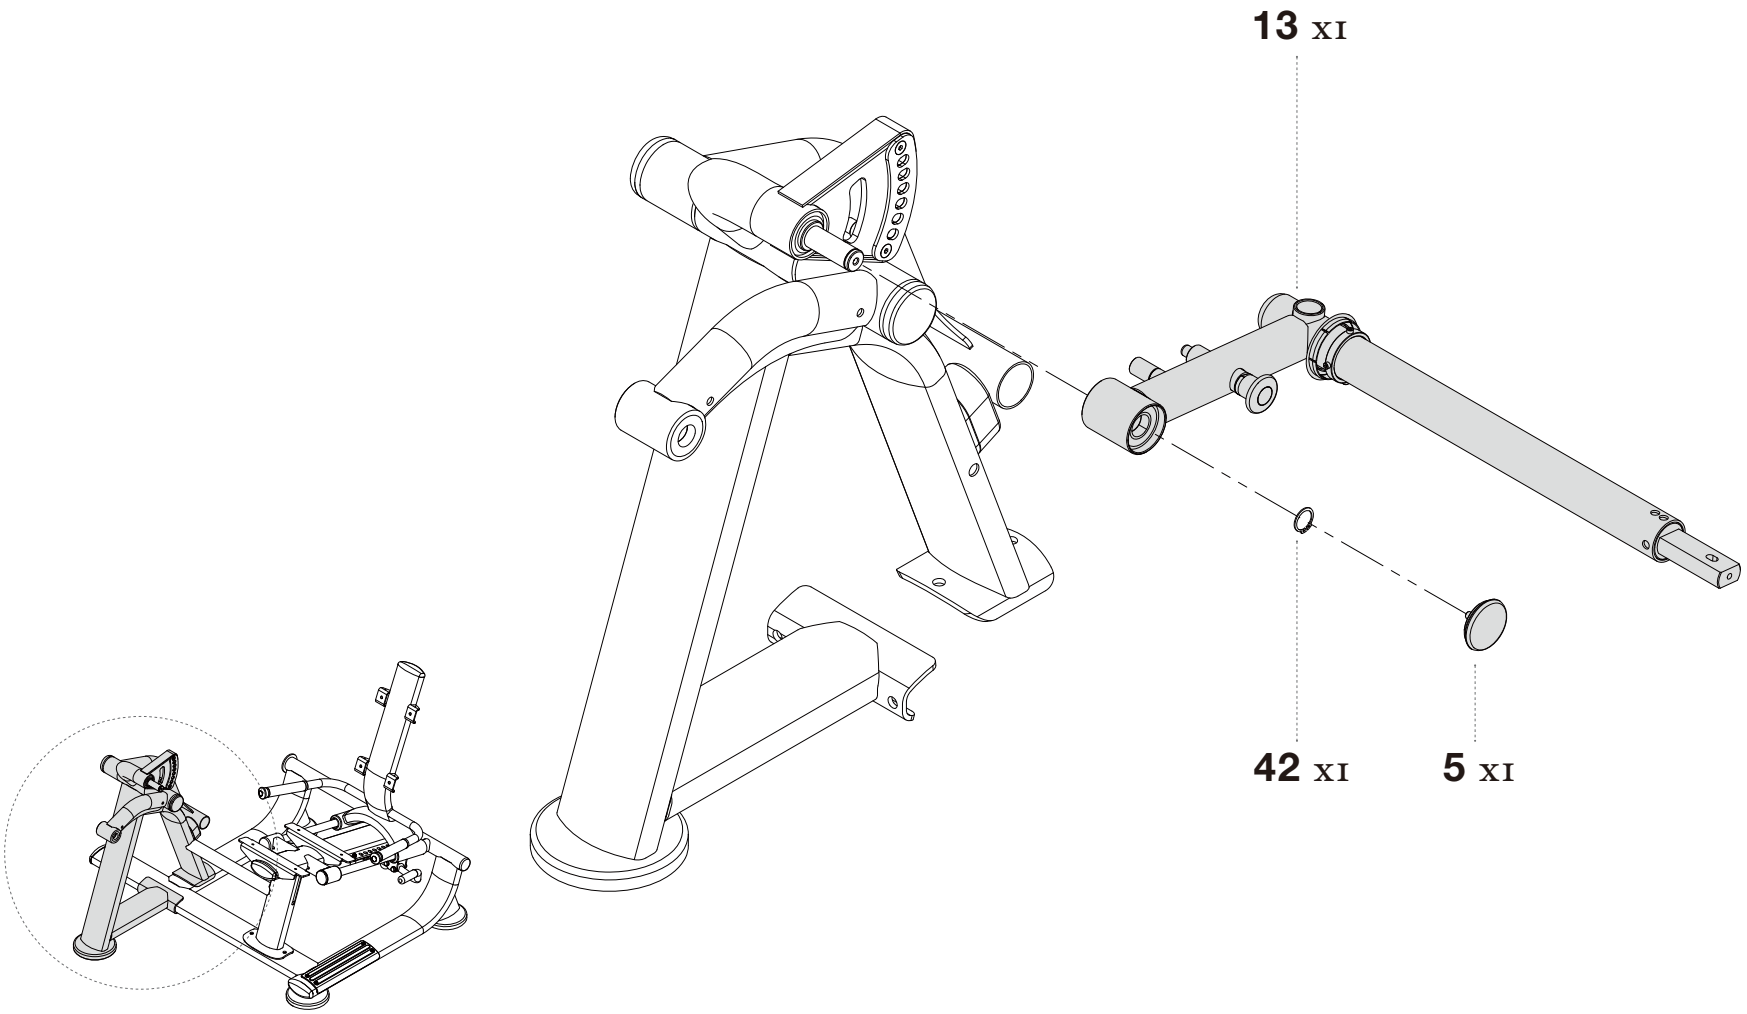
Some parts have been hidden for assembly clarity.





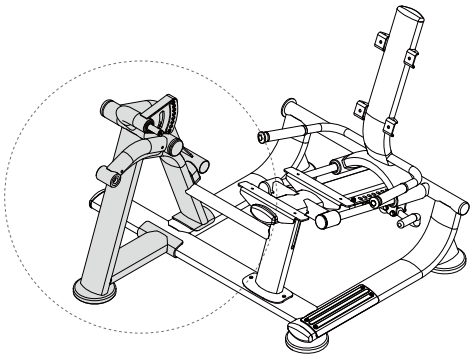
**STEP 8**
SECURELY tighten all bolt connections.

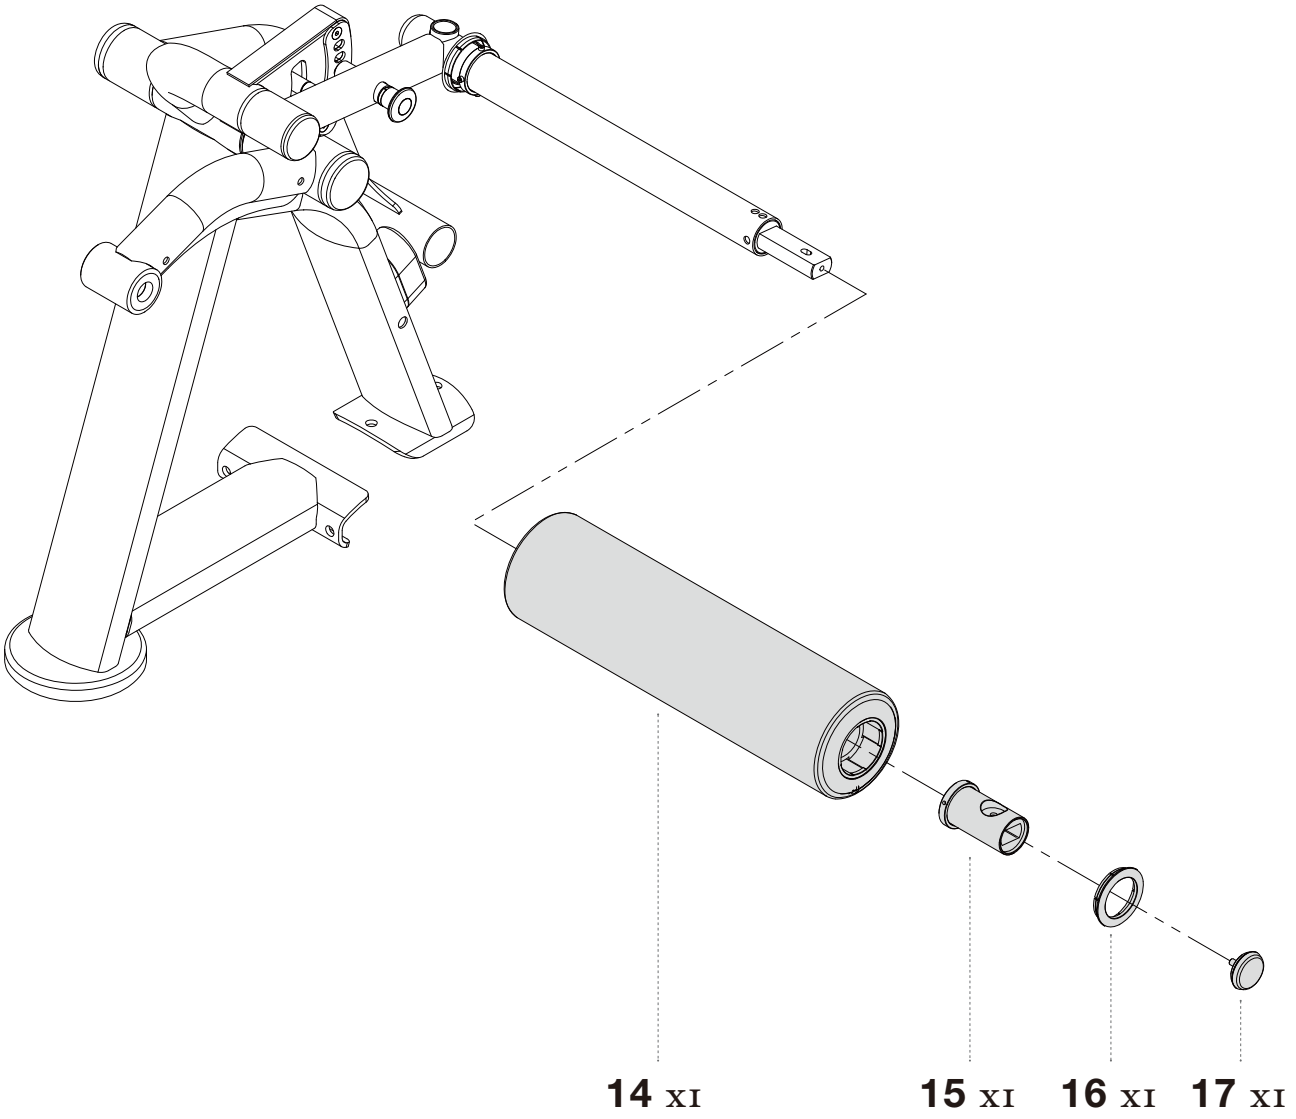
Some parts have been hidden for assembly clarity.



**STEP 9**
SECURELY tighten all bolt connections.

Some parts have been hidden for assembly clarity.

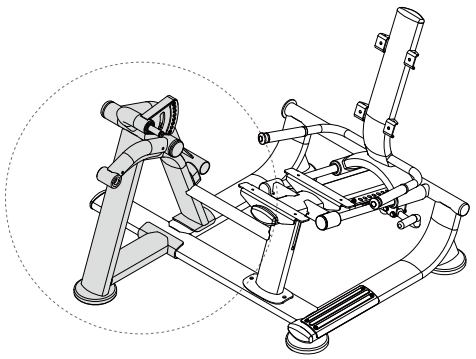


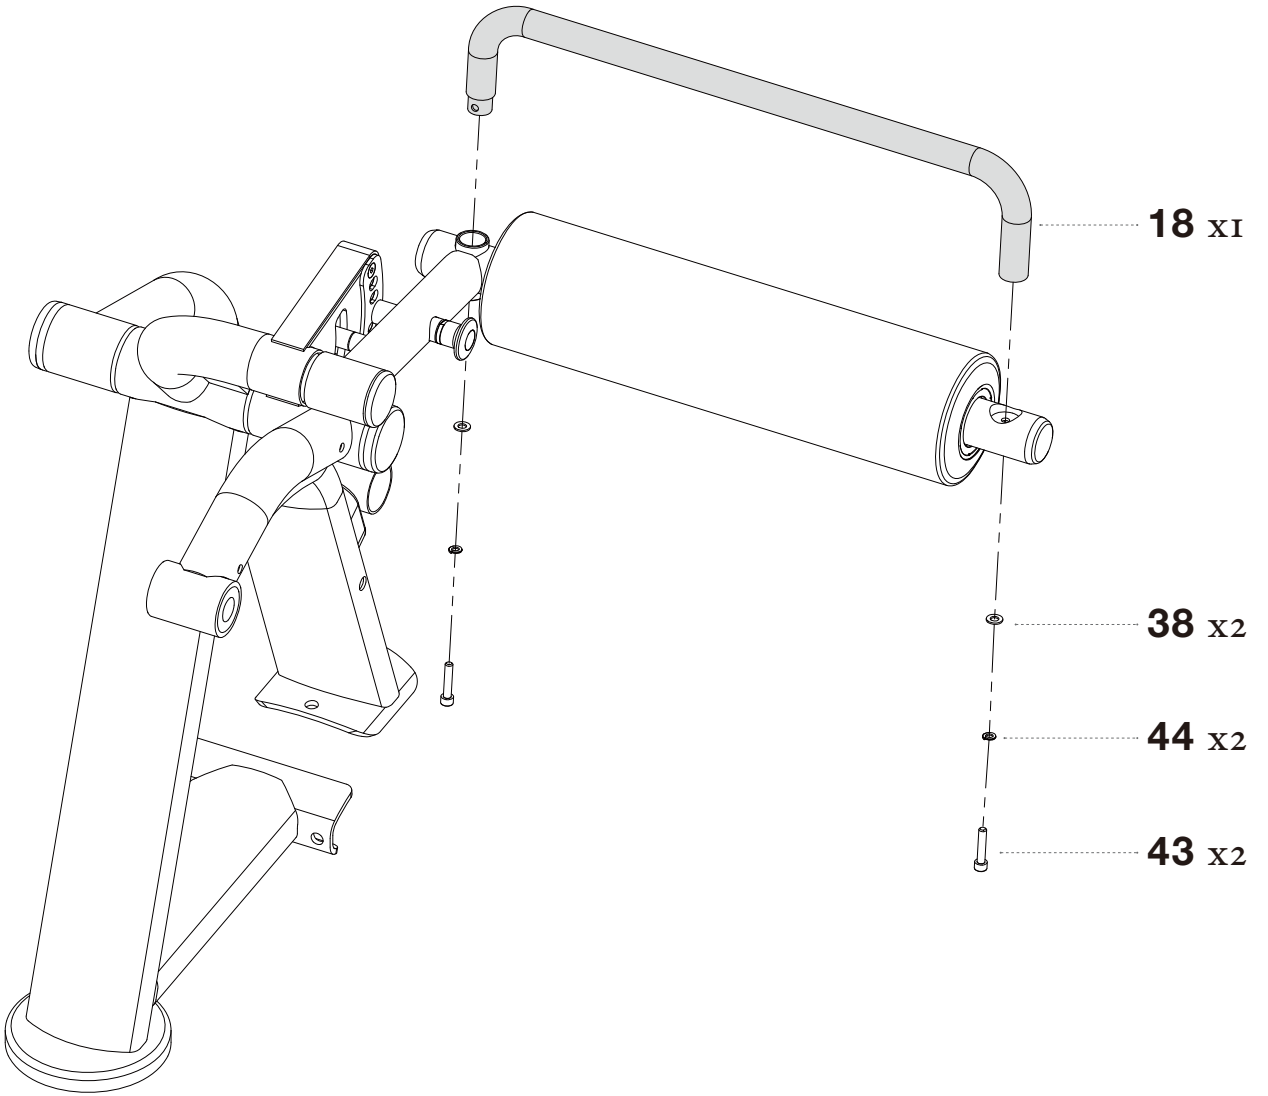


## 2.3 Assembly Guide

**STEP 10**
SECURELY tighten all bolt connections.

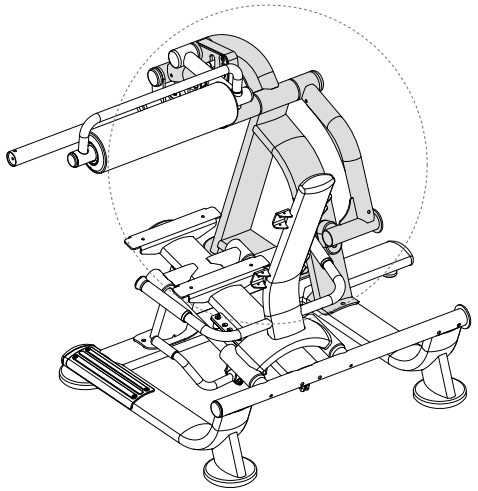
Some parts have been hidden for assembly clarity.

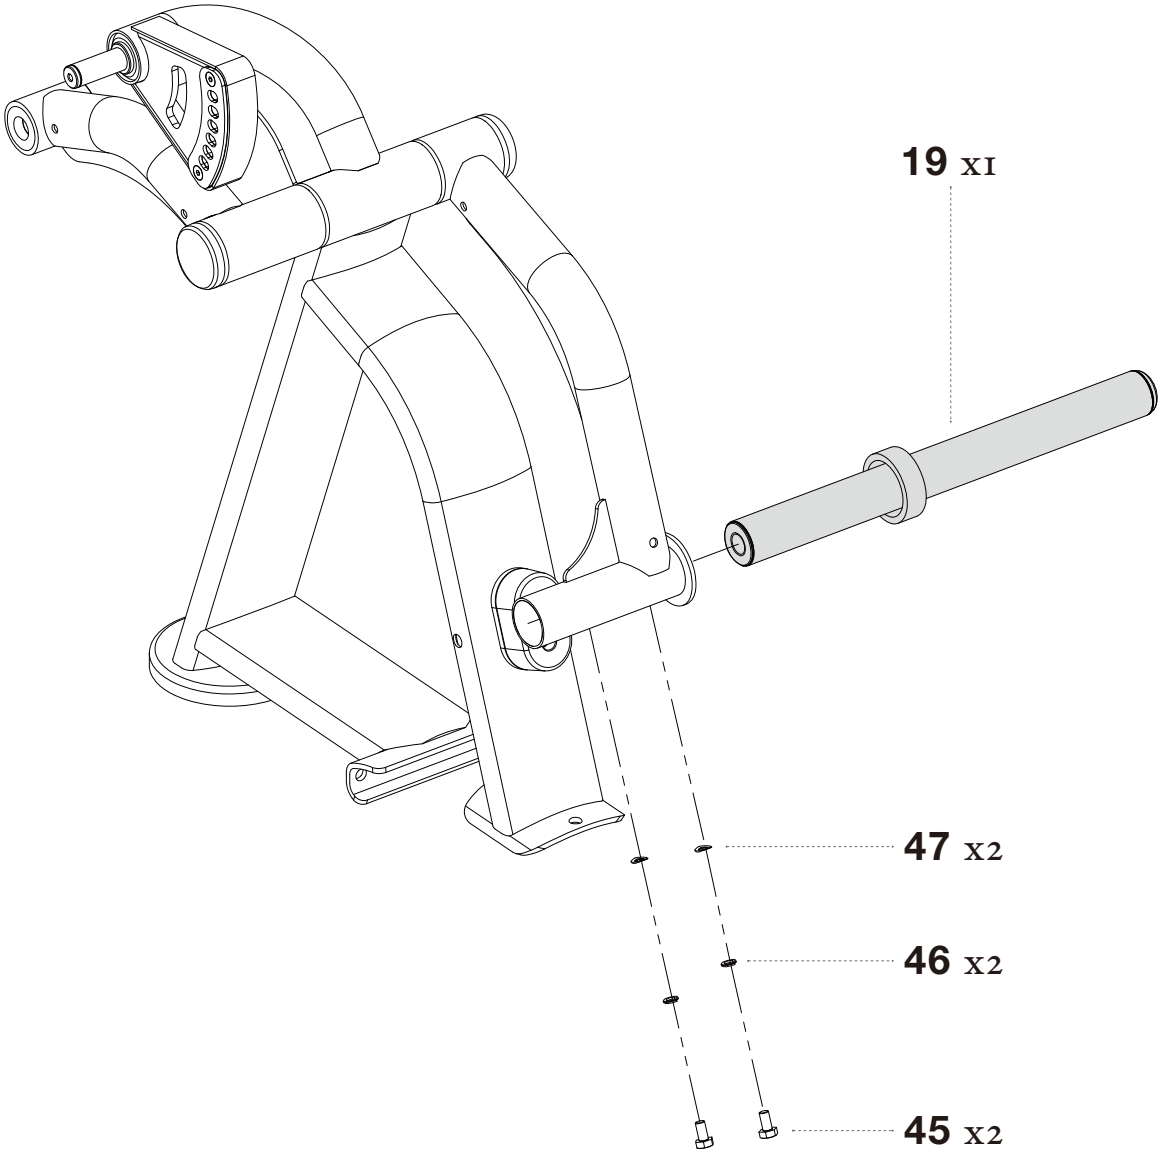




**STEP 11**
SECURELY tighten all bolt connections.

Some parts have been hidden for assembly clarity.

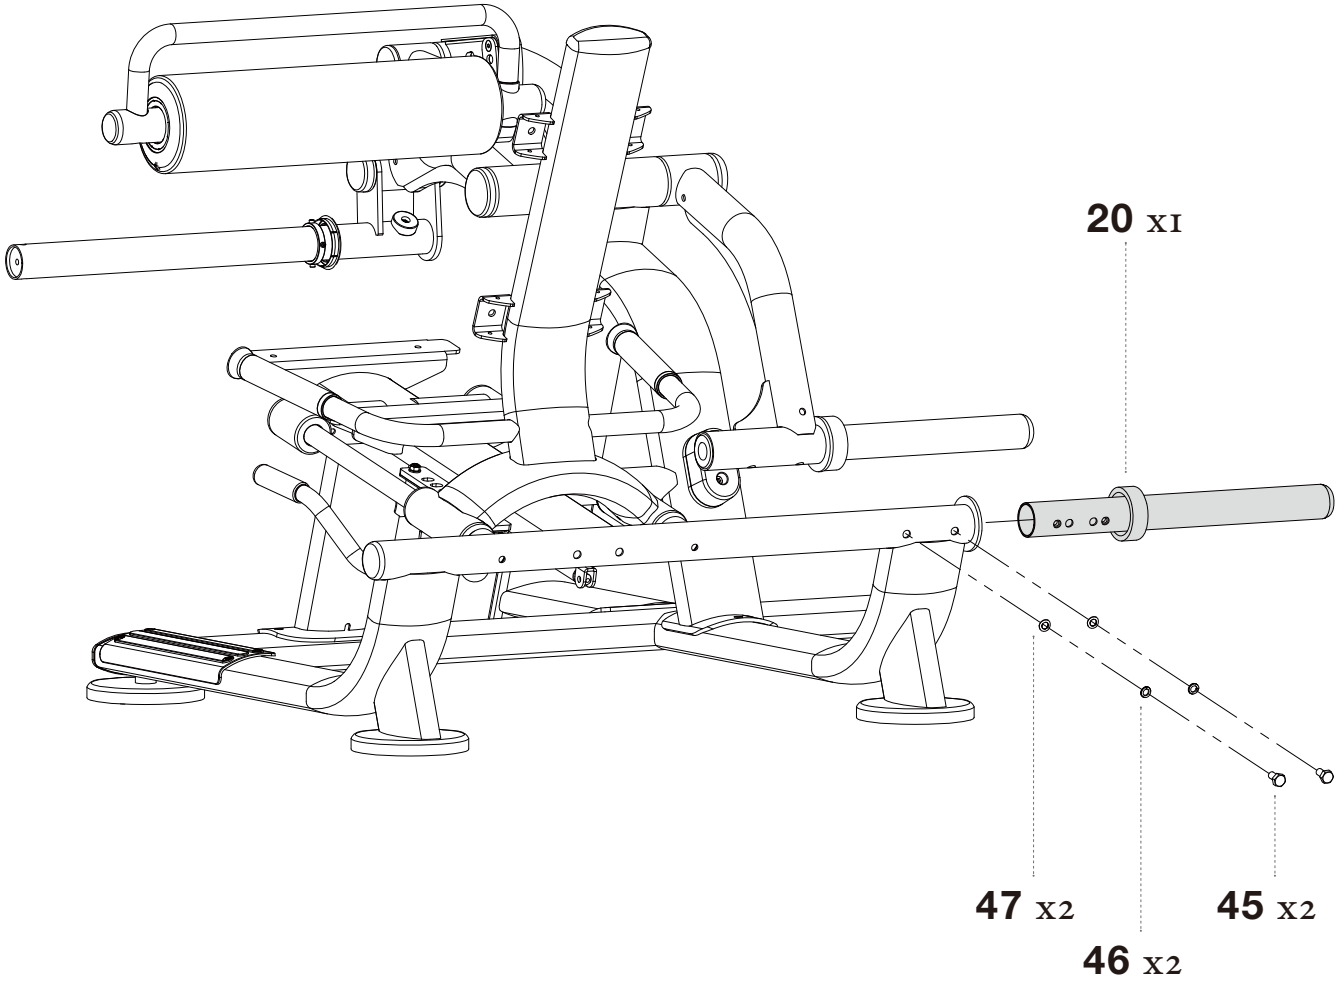




## 2.3 Assembly Guide

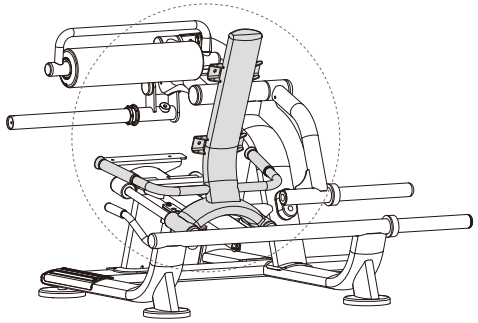
**STEP 12**
SECURELY tighten all bolt connections.

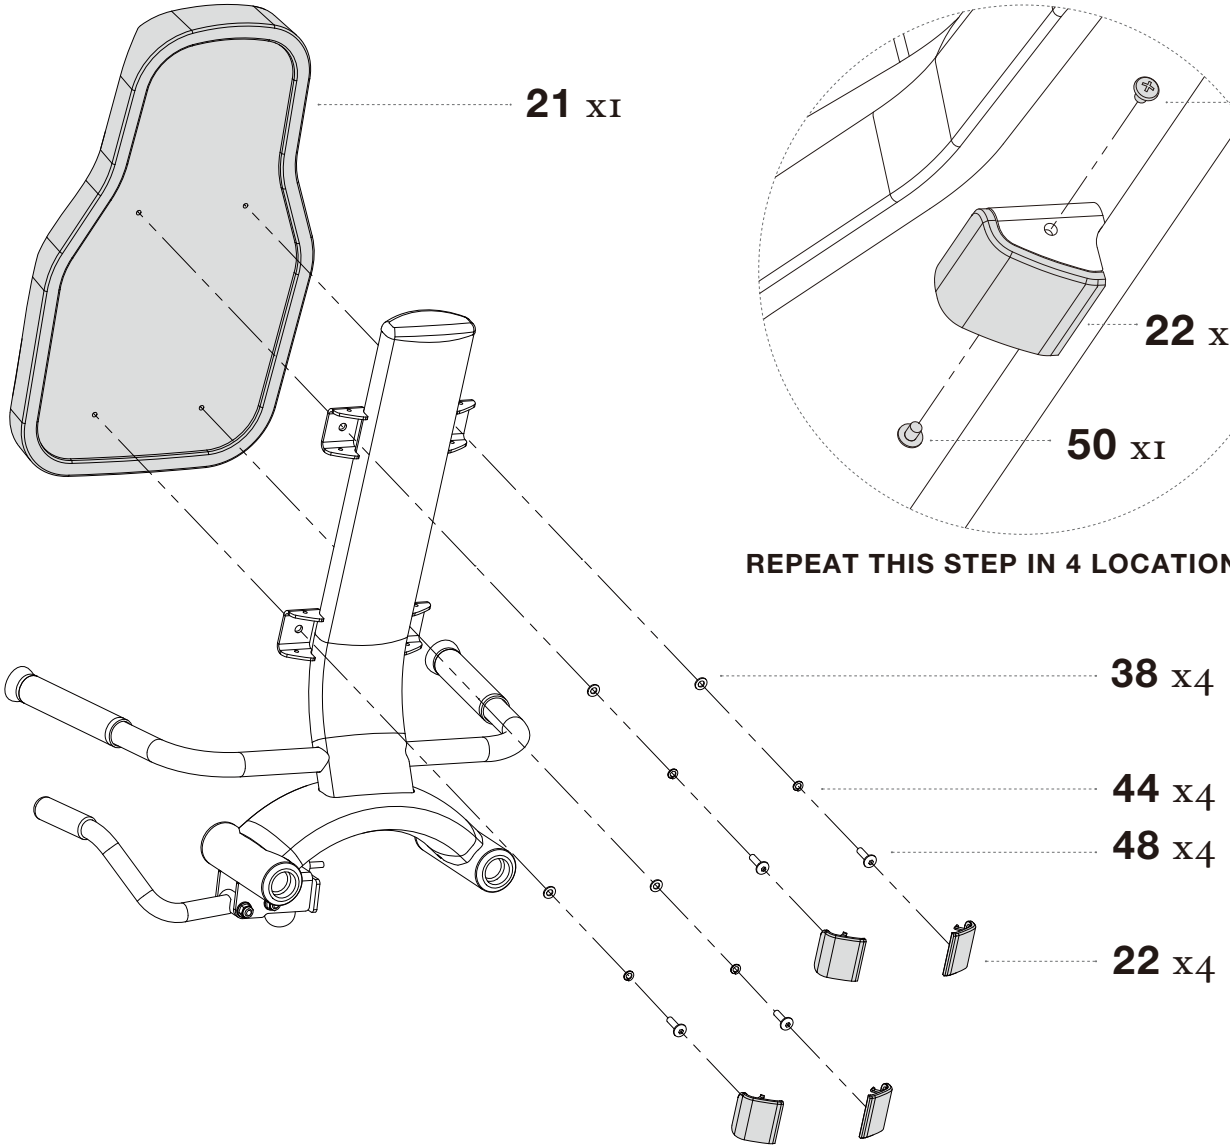
Some parts have been hidden for assembly clarity.



**STEP 13**
SECURELY tighten all bolt connections.

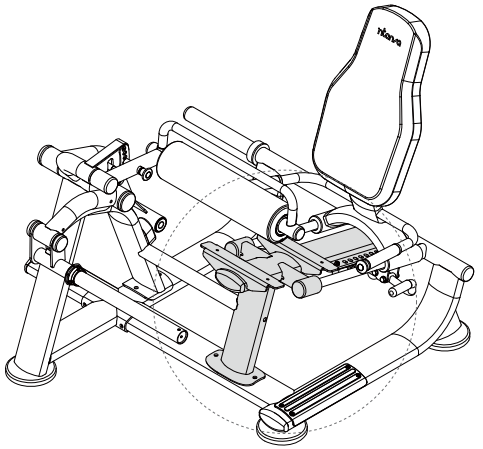
Some parts have been hidden for assembly clarity.

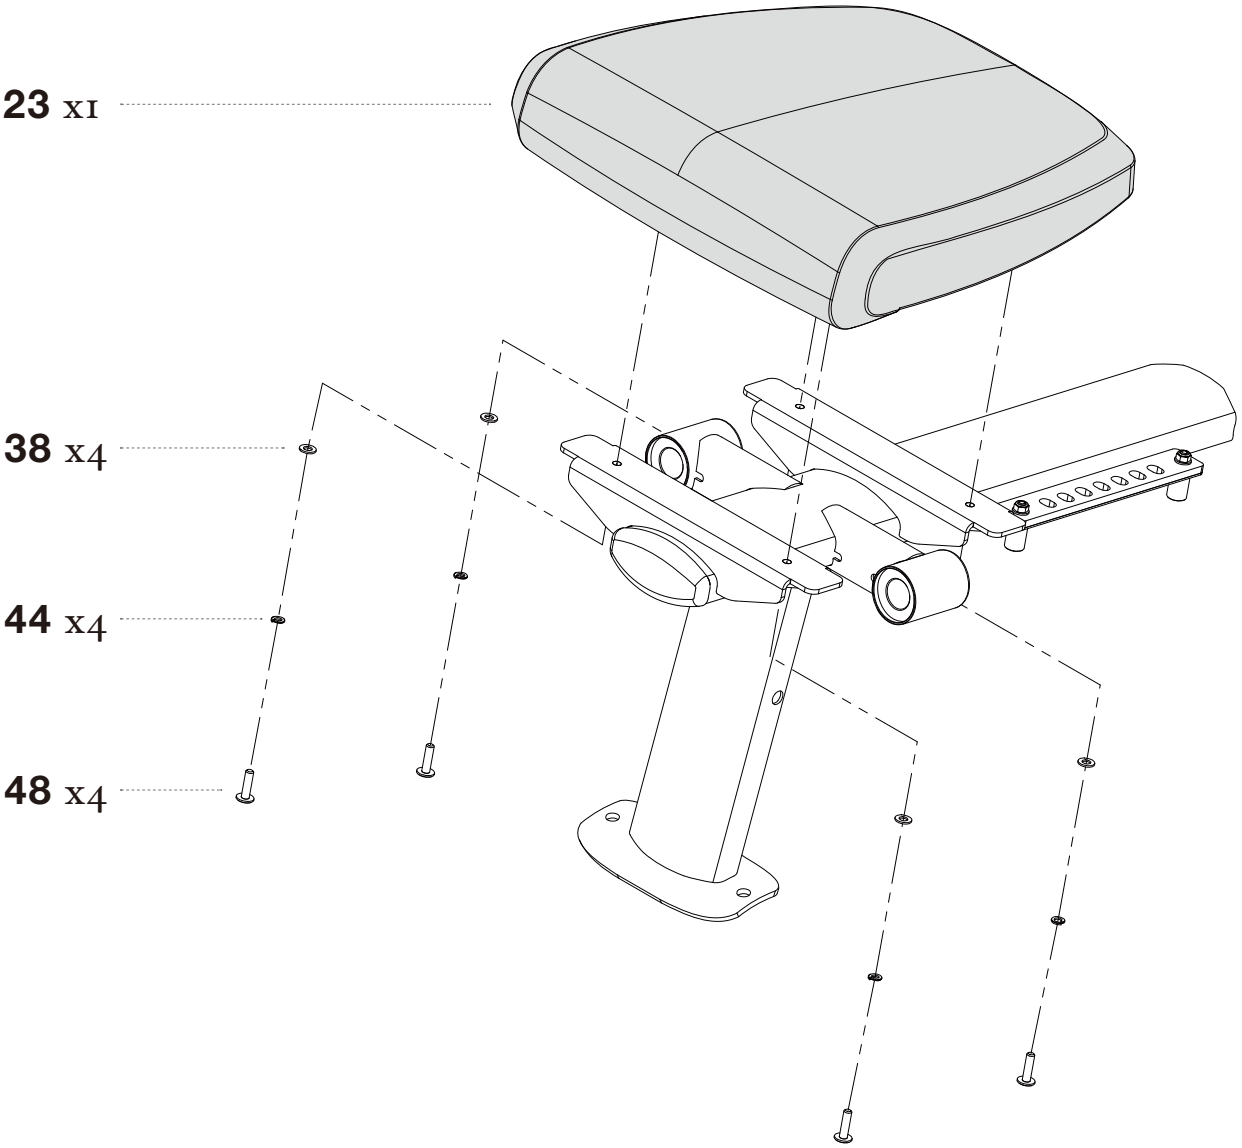




**STEP 14**
SECURELY tighten all bolt connections.

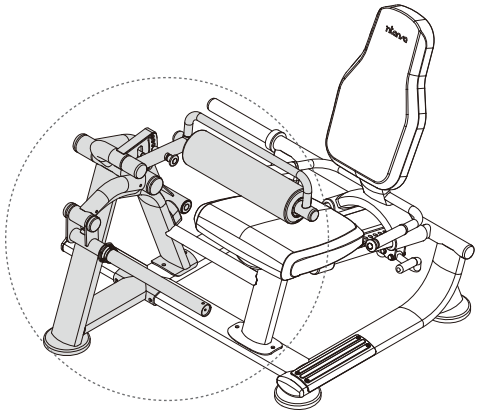
Some parts have been hidden for assembly clarity.

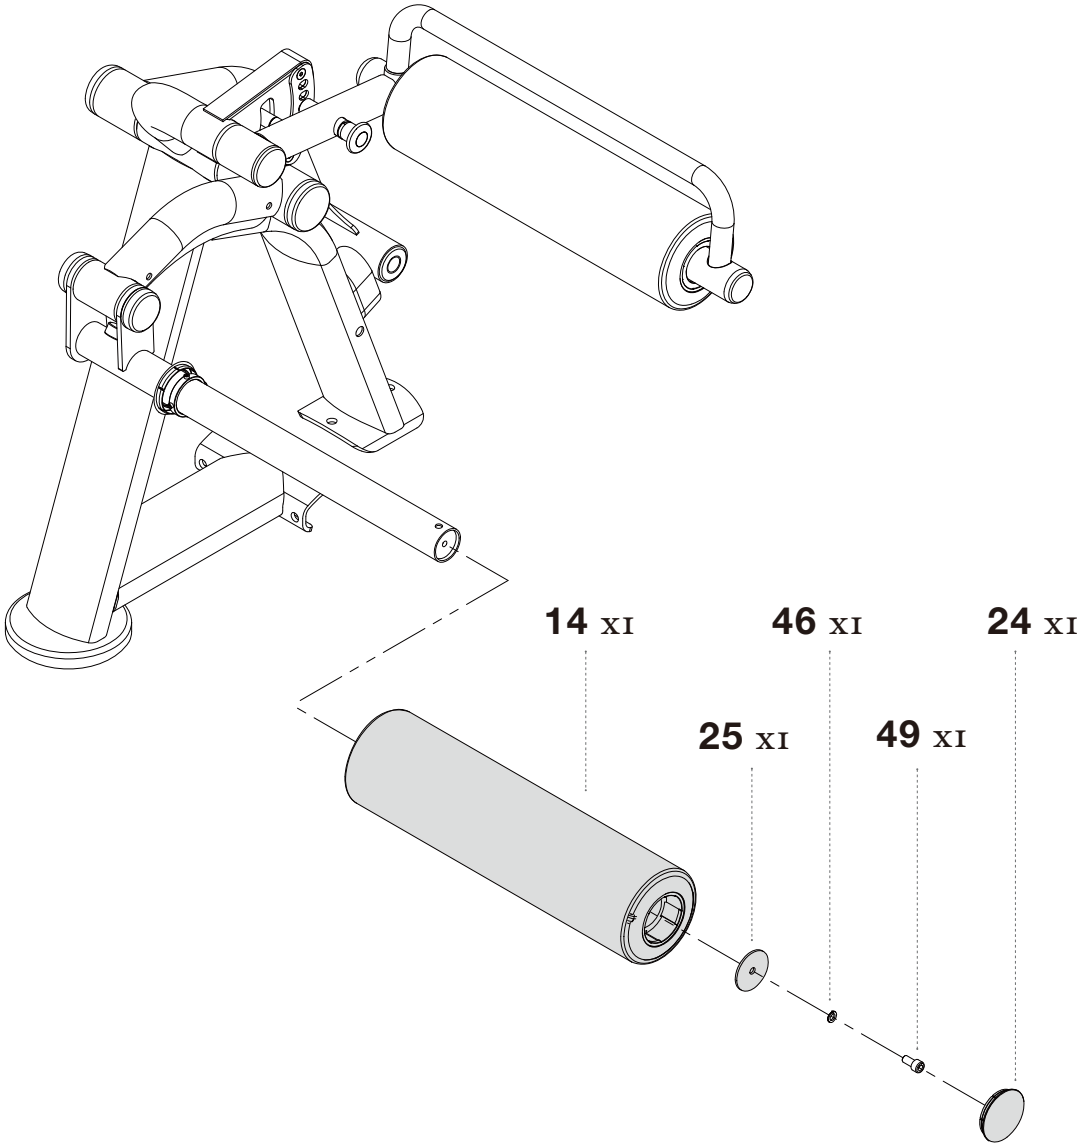




**STEP 15**
SECURELY tighten all bolt connections.

Some parts have been hidden for assembly clarity.





# 3. Using the Equipment

## 3.1 Important Safety Guidelines

### CAUTION

Before using the equipment, read these instructions and all labels. Failure to do so may result in serious injury.

- Do not allow children, or those unfamiliar with the operation of this unit, on or near it.
- Before beginning any fitness program, see your physician for a thorough physical examination. Ask your physician for the appropriate target
  heart rate for your age and fitness level.
- If you feel pain, faintness, or dizziness, stop exercising immediately.
- Injuries to health may result from incorrect or excessive training.

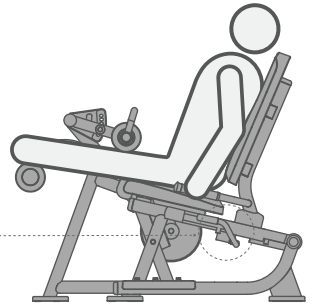
## 3.2 User's Guide

### SEATED LEG CURL

Introduction

Strengthens the hamstrings to enhance knee flexion, stability, and lower—body control.

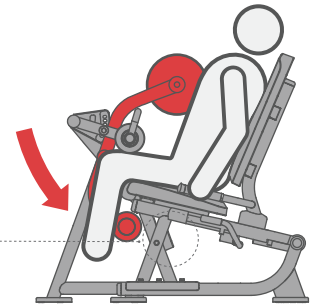
This plate—loaded machine offers smooth, seated curls with controlled resistance—ideal for balanced leg development and injury prevention.



### LOADING AND UNLOADING WEIGHTS

1. Ensure the weight post is clear of obstructions before loading weights.
2. Carefully slide the weight plates onto the slightly tilted weight post. The tilt is designed to prevent the plates from sliding off.
3. Load the weight plates evenly and ensure they are fully seated on the post for safe use.
4. To unload, simply slide the plates off one by one while keeping the equipment stable.

Note: Due to the slight tilt of the weight posts, no additional retention devices are required to secure the weights.



### ACTION

1. Adjust the backrest and leg pads so your knees align with the pivot point.
2. Load weight plates evenly on both sides.
3. Sit with your back against the pad and ankles positioned under the lower roller.
4. Grip the side handles and brace your core.
5. Curl your legs downward in a controlled motion, then pause briefly.
6. Return slowly to the starting position. Perform 3—4 sets of 10—15 reps.

### TRAINING TIPS

1 .Warm—Up: Always warm up your shoulders to prevent injury and improve performance.

2. Progressive Overload: Gradually increase weight or reps to challenge muscles and boost strength.
3. Form & Range of Motion: Lower handles until upper arms are parallel, press up fully, and keep your back against the pad.
4. Breathing Technique: Exhale during the press, inhale when lowering to maintain stability and power.
5. Vary Your Routine: Change rep ranges and use single-arm presses to address imbalances and avoid plateaus.

# 4. Care and Maintenance

## 4.1 Commercial Maintenance Schedule

| INSPECT | DAILY | WEEKLY | MONTHLY | 6 MONTHS | ANNUALLY |
|---|---|---|---|---|---|
| All adjustment pins, set screws, snap links, and pulleys | • | | | | |
| All safety and instructional decals | • | | | | |
| All nuts and bolts and tighten if needed | | • | | | |
| All anti—slip surfaces and replace as needed | | • | | | |
| All accessory bars and handles | | • | | | |
| **CLEAN** | | | | | |
| Upholstery | • | | | | |
| Guide rods and lubricate with a teflon lubricant | | | • | | |
| **LUBRICATE** | | | | | |
| Pivot bearings and linear bearings | | | | • | |

**BEFORE YOU BEGIN**

Preventative maintenance is crucial to maintaining the function and safety of this equipment. Your facility must establish written guidelines for preventative maintenance and keep written or online records of the maintenance performed on these products. As a minimum, the items presented in the Safety Instructions section of this document and the items that follow here, should be included in your maintenance program.

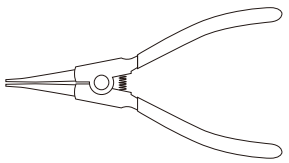
**IMPORTANT** Always purchase replacement parts and hardware from Intenza. Many parts are tested and manufactured specifically for Intenza commercial strength equipment. If you use parts not approved by Intenza, you could void the Intenza Limited Warranty. Use of parts not approved by Intenza may cause injury. Intenza recommends that maintenance technicians thoroughly read and understand the safety guidelines and maintenance procedures covered in this manual.

**NOTE** If the equipment requires assembly, please refer to 2.3 Assembly Guide Section in this manual.

**TOOLS**

1. ALLEN WRENCH, 5MM, 6MM, 8MM

2. OPEN—END WRENCH, 17MM, 19MM



3. C CLIP PLIER

4. Screw Driver

## 4.2 Daily Inspection & Maintenance

The following items are critical to the safety of users and maintenance staff as well as ensuring the optimum performance of the machines. These inspections should be performed each day before the equipment is subject to use. Intenza is not responsible for performing or scheduling regular maintenance or inspections.

- Inspect all adjustment pins, set screws, snap links, and pulleys if equipped.
- Inspect all safety and instructional decals.
- Verify that rubber hand grips are intact and secure.
- Verify that anti—skid foot grips are intact and secure.

## 4.3 Weekly Inspection & Maintenance

The following items are critical to the safety of users and maintenance staff as well as ensuring the optimum performance of the machines. These inspections should be performed each week. Intenza is not responsible for performing or scheduling regular maintenance or inspections.

- Verify that each pulley rotates freely when performing the exercise if equipped with pulleys. A pulley that does not rotate will cause extreme cable wear and could lead to cable failure. Determine cause and remedy immediately.
- Verify that the adjustment pop pins retract easily and fully engage (when released) into each adjustment disc hole/slot. The pop pins are spring loaded so they should return to the engaged position when you release the knob.
- Verify that the adjustment pin disengages and engages freely when actuating the adjustment mechanism. Be sure that the adjustment pin inserts fully into the adjustment disc.
- Verify that all hardware is tightened and that associated frame members are secure. Apply a few small drops of a thread locking compound such as Loctite on any loose bolts.
- Inspect frame for integrity and function. Replace any components at the first sign of wear with only Intenza supplied parts.

## 4.4 Other Scheduled Preventive Maintenance

Intenza recommends that scheduled maintenance be performed by a qualified service technician. Please contact your dealer or visit www.intenzafitness.com to contact a local Intenza authorized service technician.

**MONTHLY**

Clean guide rods and lubricate with a Teflon grease if equipped with guide rods.

**EVERY 6 MONTHS**

Lubricate pivot bearing and linear bearings with lithium grease.

## 4.5 Clean the Equipment

Wipe all machines with a water dampened cloth and dry completely. This includes painted parts, chrome plated parts (except guide rods), plastic parts, and upholstered pads. It is important not to leave parts damp. This will increase the potential for corrosion to occur.

### CAUTION

Certain anti—bacterial cleaners and other harsh cleaning agents can induce corrosion on the machine components. These solutions can also dry out and cause cracking and splitting on the upholstery.

#### HEAVY DUTY CLEANING

| | |
|---|---|
| GUIDE RODS (IF EQUIPPED) | Clean and lubricate with a Teflon Spray. Be sure to coat the entire guide rod. Spraying lubricant into the cap plate bushings is also recommended. |
| CHROMED ADJUSTMENT TUBES | Wipe away dust and dirt before applying a Teflon spray lubricant. Intenza recommends using TriFlow or a similar brand. |
| LINEAR BEARINGS | Clean the linear shaft and lubricate (as required) with Teflon based grease. Keeping linear bearings clean and lubricated is critical to long life and good performance. |
| PAINTED FRAMES | If you have scuff marks, grease or a heavy dirt buildup on frame components, start with a mild soap solution or a diluted solution of a product such as Simple Green with a dilution of 32:1. If you cannot remove the marks using those methods, use a car polish/cleaner. DO NOT use solvents such as lacquer thinner, mineral spirits or acetone. For deeper scuff marks, use an automobile finish rubbing compound. |
| UPHOLSTERY | For heavy duty cleaning, use a mild soap solution. This method should be sufficient in the majority of instances. In severe stain cases, you can use a solution of 5—10% household bleach diluted with water. Be sure to test an inconspicuous area first. DO NOT use chemical cleaners on the vinyl upholstery. You can also use a lanolin based hand cleaner to clean your upholstery. Wipe off after cleaning with a damp cloth and thoroughly dry. |
| PLASTIC PARTS | Use a mild soap solution to clean dirt and grease marks. |
| LABELS | Use a mild soap solution to clean dirt and grease marks. |
| SHROUDS | Use a mild soap solution to clean dirt and grease marks. |

### CAUTION

Do not use any acidic cleaners. Doing so will weaken the paint or powder coatings and may void the Intenza Warranty. Never pour or spray liquids on any part of the equipment. Allow the equipment to dry completely before using.

### CAUTION

If you determine that the equipment needs service, make sure that the equipment cannot be used inadvertently and ensure other users know that the machine needs service.
